- Frontage area increases from Section 506.2 are computed thus:  
a. Perimeter which fronts a public way or open space having 20 feet minimum width = 160 (F)  
b. Total Building Perimeter = 160 (P)  
c. Ratio (F/P) = 1 (F/P)  
d. W = Minimum width of public way = 30 (W)  
2. Unlimited area applicable under conditions of Section 507.  
3. Maximum Building Area = total number of stories in the building × D (maximum 3 stories) (506.2).  
4. The maximum area of open parking garages must comply with Table 406.5.4. The maximum area of air traffic control towers must comply with Table 412.3.1.  
5. Frontage increase is based on the unsprinklered area value in Table 506.2.
